

## Rhodes expects interim HEPS to almost double

Rhodes Food Group said on Tuesday that it expected to report on May 23 that, excluding the R21.8m listing costs, headline earning per share (HEPS) for the six months to March 29 had nearly doubled from the matching period's 26.7c.

The company, which listed last year, said that including listing costs it expected to report growth in normalised HEPS of between 35% and 40% from the matching period's 36.6c.
