

Peugeot's new mobility programme comes to SA

Peugeot's new mobility programme, designed by PSA France, was specifically engineered for vehicles falling under the PSA Warranty and Maintenance policy. The new mobility programme is strategically divided into two separate policies and procedures.

The first is mobility for vehicles under the carmaker's warranty and the latter, mobility for vehicles with an active PCSA maintenance plan, that is no longer under warranty.

Depending on the repairs to be carried out courtesy vehicles are rented through a rental agency by the authorised Peugeot dealership in order for the customer to be mobile while the vehicle is still under warranty and physically in the workshop.

In order to qualify for mobility, the vehicle must be under warranty and/or a full maintenance plan. The vehicle must be in an authorised Peugeot workshop, and be immobilised.
